

EnviroSorb® Reusable Underpads FAQ's

- **What is different about the EnviroSorb® UOC Reusable Underpad?**
 - The EnviroSorb® UOC Reusable Underpad has all the features of a “normal” underpad. It has great moisture wicking and absorption properties. In addition to that, it chemically neutralizes urine odor.
- **How much urine can it hold?**
 - The EnviroSorb® UOC Reusable Underpad can absorb approximately 8.5 fl. Oz.
- **How many times can it be used?**
 - The EnviroSorb® UOC Reusable Underpad can be used 30 to 50 times depending upon volume absorbed. The EnviroSorb® UOC Reusable Underpad will begin to lose odor neutralization capability after 30 to 50 uses but depending on care and volume it can continue to absorb urine even after 50 washes.
- **When should I dispose of it?**
 - Most LDI Medical customers dispose of the EnviroSorb® UOC Reusable Underpad when it begins to lose its urine odor neutralization capabilities.
- **What is it made of?**
 - The EnviroSorb® UOC Reusable Underpad made of a blend of poly/rayon soaker with green film fluid barrier, and a 55%/45% cotton/polyester Twill.
- **Does it come in other sizes?**
 - Not Yet. As the EnviroSorb® UOC Reusable Underpad franchise grows we are open to new sizes. If you have a specific size in mind, please contact us (make that a link) and we will consider that size.
- **How many come in a case?**
 - The EnviroSorb® UOC Reusable Underpad is delivered 24 pads per case.
- **How does it make urine odor go away?**
 - The soaker pad on The EnviroSorb® UOC Reusable Underpad contains an odor neutralizing chemical agent which neutralizes the odor of urine.
