

LDI medical™

Sustainable Technology · Clinical Innovation · Ultimate Performance

"We have been using the underpads for several months now. Most of our residents are fully incontinent. These underpads absorb more urine, keeping it away from the person's bottom, as well as block the odors. We have not had an underpad that actually blocks urine odors like this product. We are very pleased with the results, and the cost is comparable to all of the similar size pads we have used over the years."

-Liz Littleton, MSN, AGCNS-BC, Owner
Lighthouse Assisted Living

Because your patients and staff deserve a pleasant environment ...

You do everything you possibly can to provide the best care and experience for your patients, residents and staff ... and that includes the environment in which they heal, live, and work daily.

Neutralizing odor — specifically, urine odor — within your facility is now made easier, thanks to a brand-new product developed and launched late last year as a direct result of feedback from healthcare professionals and advocates like you ...

Introducing EnviroSorb® Reusable Underpads: The Ultimate Upgrade in Urine Odor-Control & Comfort

Welcome to the next generation of medical underpads: EnviroSorb® UOC by LDI Medical — with rapid urine odor control that can truly make a difference in the lives of your patients, residents, and hard-working staff. Not only do they work incredibly well, they can laundered and reused up to 30 times.

The Science Behind the Solution

EnviroSorb® UOC underpads feature unique proprietary materials and innovative design features to offer your patients the ultimate upgrade in urine odor-control and comfort.

- ✓ **Advanced Moisture-Barrier Technology:** Soft, fast-wicking unique cover material neutralizes odors and is ruggedly quilted to an absorbent core that rapidly traps fluid to prevent leakage and keep your patient dry.
- ✓ **Unique, Long-Lasting Urine Neutralizing Chemistry:** The proprietary materials start going to work immediately to absorb and minimize urine odor, and continue to work effectively after multiple launderings (up to 30 times) with bleach or peroxide.
- ✓ **Eco-Friendly, Economical & 100% Designed for Comfort:** Thoughtfully constructed lay-flat technology eliminates unwanted bunching and rolling while keeping the pad thin and compact with maximum absorption and improved laundering performance (drastically reducing waste). Latex-free, PVC-free, allergen-free, and Prop 65 compliant.
