LDImedical™

Sustainable Technology· Clinical Innovation· Ultimate Performance

Because better glove liners are your first line of defense ...

New + Improved Flex-Gard® Cut-Resistant Sterile Glove Liners: Your #1 choice for protection on the job ... same price, but now 3 times more cut-resistant!

Protecting your team from the risks associated with cuts, scrapes and abrasions is now easier, thanks to a reformulated product engineered by the LDI Medical team.

Maximize your workplace safety with Flex-Gard® Cut-Resistant Sterile Glove Liners, featuring a new high-performance protective fiber mix and a strategic tighter weave. Not only do they work incredibly well, they are thoughtfully designed to allow better grip, dexterity, and long-term comfort. **Get the glove liners you trust, now 3 times more cut-resistant, at the same price.** Available in 6 sizes for the perfect fit, with convenient color-coded wrists. **Rated Cut-Level A3 by ASTM standards.**

The Science Behind the Solution

- ✓ Advanced Protective Technology + Materials: Ultra-thin, lightweight + flexible design allows you to perform nimble work without compromising safety. Helps minimize cuts, abrasions and slashes, reducing exposure to injury while allowing you to keep a good grip on slippery tools. *Please note these liners are engineered to protect against blades, scalpels, and sharp edges, not punctures or needlesticks.*

- ✓ Performance You Can Trust – Now 3 Times Stronger: LDI's improved glove liners are now rated at Cut-Level A3 by the new, more stringent ASTM standards — 3 times more cut-resistant than previous design. In independent lab tests, they also showed 157% better cut-resistance than the leading competitor.

- ✓ Eco-Friendly & 100% Designed for Workplace Safety: Sterile liners are 100% latex-free and powder-free for allergen reduction, chemically inert, and biocompatible.
